MADE IN INDIA

About Us

Torso Pipes are manufactured using the latest technology and high-grade raw material. These pipes are ideal for transportation and distribution of water in households including potable water, industrial process lines, saltwater lines, swimming pools, pipes used for hand pumps, and in down-take lines in plumbing systems.

Manufactured with added strength and crafting precision, Torso pipes have a prolonged life advantage over conventional pipes surpassing most or all traditional metal and other plastic pipes. This lightweight product's abrasion resistance, mechanical strength, toughness, and durability are our main features.

These pipes are manufactured using a lead-free compound and are environment and health friendly. Our stringent quality assurance approach across all stages of manufacturing gives this product a high degree of reliability, thus we are the preferred choice of our customer.

Our Product Range

UPVC
Pipe & Fiting

SWR

Irrigation
Sprinkaler & Drip

UPVC

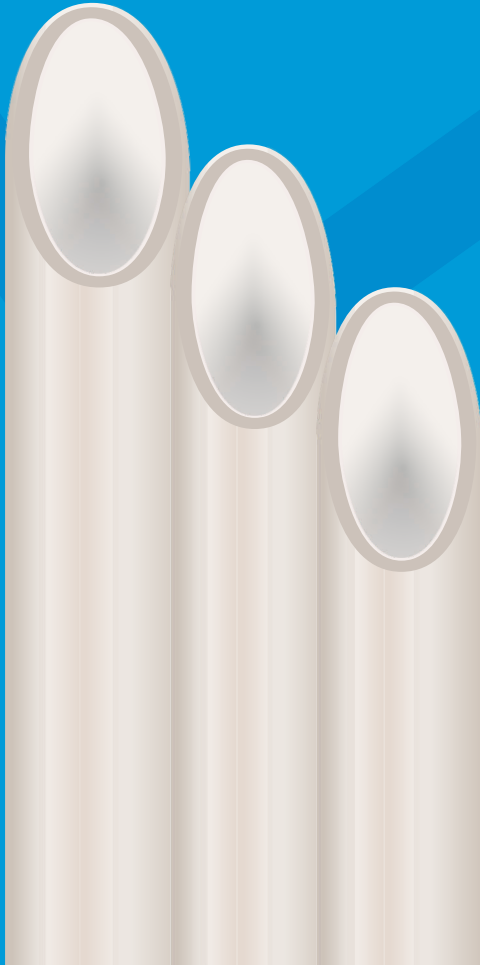

Piping System

Torso Upvc Pipe are specially designed for cold water operation of residential & commercial Building these pipes are non toxic and lead free which makes them safe for carry portable water

20-200MM

UPVC

Piping System

Benefit Of Torso UPVC Pipe

1. Quick, easy and convenient installation
2. Corrosion and abrasion resistance
3. Tough and reliable
4. Cost effective

COLUMN

Piping System

Torso column pipes are suitable for water extraction from the bore wells. These pipes are uniquely designed and manufactured using lead free compound on highly advanced, state-of-the-art CNC machines. Torso column pipes have been designed to withstand system load comprising the weight of the pump, water and pipes with an adequate factor of safety.

Column Pipe

COLUMN

Pipe

Benefit Of Torso COLUMN Pipe

1. Long life
2. Light in weight
3. Easy installation
4. No electrolytic deposition
5. Cost saver
6. No rusting or corrosion

CASING

Pipe

Borewells are the widely accepted source of water supply for people today. Torso Casing Pipes have proven to be strong & durable, therefore they are the best choice for borewell construction.

125-200MM

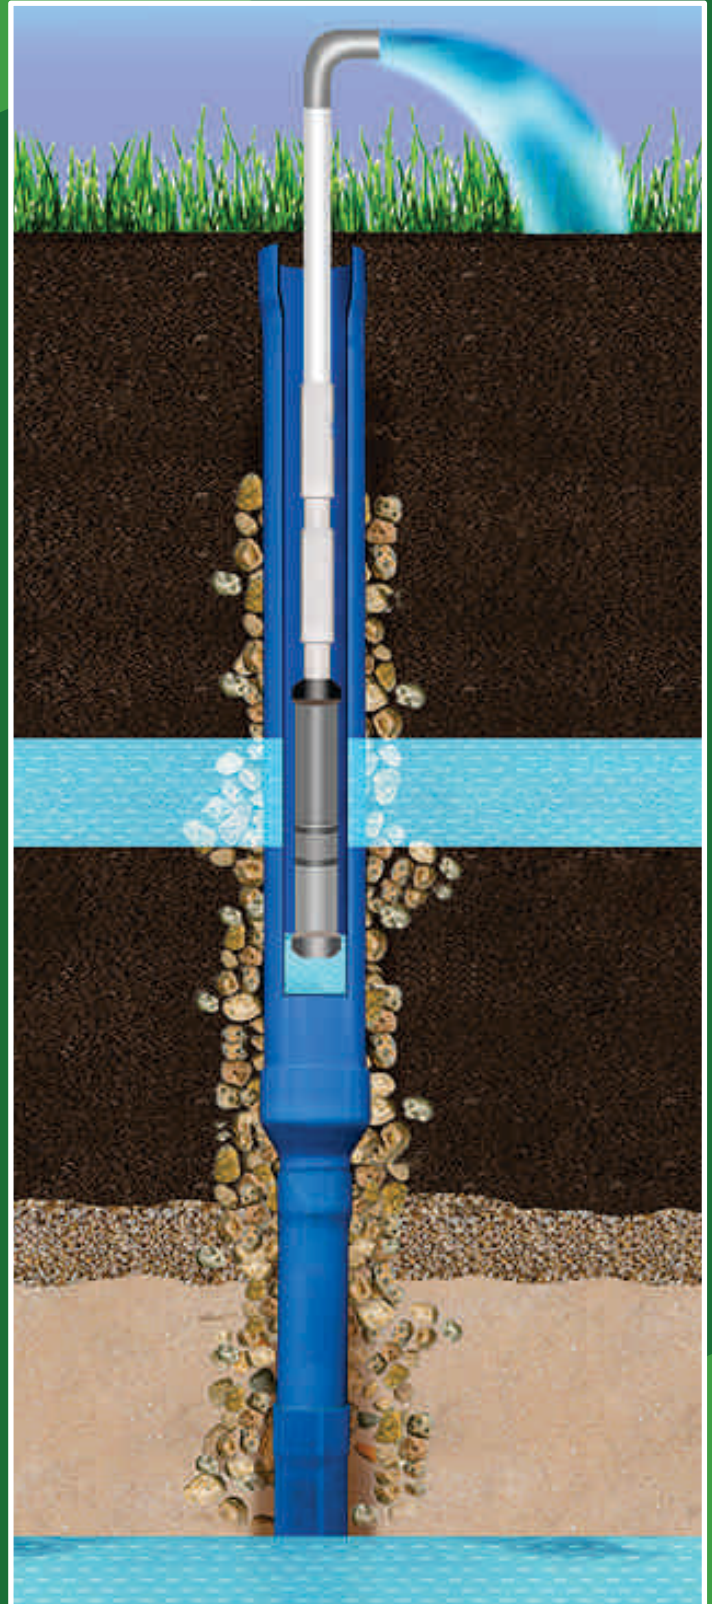

CASING

Pipe

Benefit Of Torso Casing Pipe

1. Non - Corrosive
2. Non Toxic
3. Quick & Easy installation
4. Non electrolytic deposition
5. Light in weight
6. Long life / Durable

HDPE

Pipe & Fiting

Torso Pipe introducing high quality superior grade HDPE (High Density Polyethylene) pipes intended for the conveyance of water. These pipes are manufactured as per BIS specifications - IS 4984 & available in raw material grades PE-63, PE

20-200MM

HDPE

Pipe & Fiting

Benefit Of Torso HDPE Pipe & Fiting

1. Manufactured from 100% virgin raw material.
2. Outstanding flexibility and crush resistance
3. Superior strength and durability .
4. Lightweight
5. highly flexible
6. Easier installations
7. Excellent chemical resistance
8. leak-free
9. Excellent flow characteristics

Rigid

PVC Pipes & Fittings

Torso offers an exhaustive range of Rigid PVC Pipes and Fittings as per ISI standards. These pipes and fittings are used for a variety of applications like irrigation, water supply, industrial process lines, swimming pools, firefighting mains etc.

20-200MM

Rigid

PVC Pipes & Fittings

Benefit Of Torso Rigid PVC Pipes & Fittings

1. Strong and reliable
2. High corrosion resistance
3. High chemical resistance
4. Economical

SPRINKLER & DRIP

Irrigation System

Drip & Sprinkler irrigation is an efficient method of application of water at the plant bottom at a rate nearly equal to the consumptive use rate of the plant, thereby minimizing the conventional water losses like percolation, runoff and evaporation from soil. It is a process of slow application of water on, above or beneath the soil by the surface, sub-surface, bubbler, and spray or pulse system.

Sprinkler & Drip Irrigation 63-110MM

SPRINKLER & DRIP

Irrigation System

Benefit Of Torso Sprinkler & Drip Irrigation System

1. Double production of Crop.
2. Easily fertilization.
3. Prevent soil erosion.
4. Irrigate undulating and mountain area.
5. Equally distribute water to each root of plant.
6. Environmentally friendly.
